ChatGPT launched a business profile

What local business owners should actually do

POINT 01

It is free to claim

Verified businesses can correct what ChatGPT shows about them.

Claim it from the ChatGPT sidebar, it takes about 10 minutes.

POINT 02

Local listings: US only, for now

Local shops can currently claim only existing US listings.

Outside the US? Get your website and listings ready, then claim when it opens.

POINT 03

Keep your facts identical everywhere

ChatGPT still reads your website, Google profile and directories.

Match name, phone, hours and service area on all of them.

POINT 04

Google still holds the buying intent

Someone searching 'emergency plumber near me' is ready to call, and that search happens on Google.

Keep Google Ads and your Business Profile running. Do not pause them for AI mentions.

SAVE THIS

Stay found where customers search

Save this for later and share it with a local business owner.
